For a full list of our conferences visit: www.pavpub.com/events

Aims of the conference

- **Highlighting health and wellbeing as a priority** – delegates will gain an understanding of the reasons why health and wellbeing is the next big challenge to address, particularly for people with learning disabilities.
- **Exploring PT solutions** – delegates will discuss the solutions that personalised technology might provide.
- **Identifying touch points** – delegates will explore the ways that technology solutions can be transferred to other groups; to improve health and wellbeing for all (not just those with learning disabilities).

Key themes

- Health and wellbeing as the next big challenge for personalised technology
- Using technology for early detection and prevention of health concerns
- People with learning disabilities as a priority for improving health monitoring
- Better use of resources
- How to transfer technology solutions to mainstream groups
- Visions for the future of the way we all look after our health and wellbeing

Who should attend?

- Health and social care commissioners
- Health and social care professionals
- Clinicians and clinical commissioning groups
- Manufacturers of technology
- Service providers
- Carers (whether family members, supporters or advocates)

About the conference

The conference is intended to spark a discussion about how technology can be used to address the challenges of prevention, detection and early intervention for health concerns in people with learning disabilities.

Many people with learning disabilities have additional health concerns that arise, not only as they grow old but throughout their lives, and they cannot always communicate their symptoms or recognise changes in their health. We will look at the ways technology can be used to help people with learning disabilities, and those who support them, to monitor their own health and wellbeing.

Building on the work of Hft, using personalised technology for independence and safety, the conference will also explore how personalised technology (PT) for health and wellbeing can be used with all groups, taking learning disability as an example to learn from.

Conference convenors

Hft is a leading national charity that supports people with learning disabilities. Every day our creative and resourceful thinking helps people to get the most out of life.

Founded by pioneering families more than fifty years ago, we continue to work in partnership with the people we support and their family and friends to understand their individual needs and goals. Our staff expertise includes supporting people with complex needs, challenging behaviour and specific syndromes like autism spectrum disorders.

Our person centred support, combined with our leadership in using personalised technology, enables people with learning disabilities to live more fulfilled lives whatever the level of need.

In an effort to extend the reach of personalised technology, Hft has been working in partnership with Mi (More Independent), part of the Dallas programme (Delivering Assisted Living Lifestyles At Scale), which is funded by The Technology Strategy Board. The Mi partnership, based in Liverpool, aims to transform lives through technology and is working, in the longer term, to support people to manage their own healthcare needs, reducing the need for medical intervention and to improve diagnosis.

We played an instrumental role in the development of the Mi Smart

House (based on the Hft mobile Smart House), which will be on display at the conference.

This is a picture of Peter, a person with learning disabilities who is supported by Hft. One of Peter's favourite pastimes is to play football with his housemates. Health and wellbeing is more than just having medical equipment in place when we get ill. With effective health monitoring, and creative solutions for prevention and early detection, people like Peter can lead a healthier lifestyle, enabling them to take an active part in their community and get the most out of life. Being active also helps to keep Peter healthy for longer.

Continuous professional development

Professionals within the social care sector are required to undertake Continuous Professional Development (CPD). Delegates can gain CPD points from attending our conferences and exhibitions. This conference may help towards your knowledge requirements at Quality Credit Framework level (QCF) level 3 – 8. (QCF are replacing NVQ's) The Health and Care Professions Council (HCPC) standards for social worker's continuing professional development (CPD) focus on the benefits of learning. Pavilion events are designed with learning outcomes in mind – all conferences and seminars are CPD certified, and we provide evaluation documents to help support

you to record how your learning activities will impact on your practice.

About Pavilion

Pavilion is the leading publisher and event organiser for those working in social and healthcare fields, whether they work in the statutory, private or voluntary sectors. We publish over 200 training packs, Mental Health Today and Learning Disability Today magazines.

Free bursaries

Pavilion recognises the contribution people from across health and social care make to our conferences. To

ensure our conferences are accessible to people using services, unwaged/family carers, and students, there are up to five free places available at each conference.

To apply, please write to us by post or email stating why you would like to attend this particular conference.

Post: Pavilion Publishing and Media, Rayford House, School Road, Hove, East Sussex BN3 5HX

Email: info@pavpub.com

Remember to include your contact details as we will be in touch two weeks before the conference to confirm if you have been given a place.
