YOUR INVITATION

13 & 14 JULY 2016

COLLABORATE TO IMPROVE CARE

A HACKATHON FOR CARE HOMES

Unique and inspiring two-day practical problem solving

Do you have a passion for making a difference to the care provided in schemes and care homes around the country? Do you like to problem solve and find innovative solutions to everyday issues in delivering healthcare to keep the more vulnerable members of our society safe, well and avoiding admissions into secondary care?

If yes, then join us on **13th and 14th July 2016 in Liverpool** for this unique event.

Hackathons represent a hands on, dynamic approach to finding innovative solutions to everyday problems and are being used worldwide to develop new ways of improving healthcare and well being.

Want to know more? Go to www.innovationagencynwc.nhs.uk/news-events/hackathons

Who should attend?

We want to bring a diverse mix of people together:

Health and care: Healthcare scientists, clinicians, care professionals, commissioners, GPs, community care professionals, citizen representatives, elderly care physicians, public health and mental health professionals.

Academia: Information management, engineering, computer science, bio-medical sciences and design.

Business: SMEs, technology companies, pharma and medical devices.

This event is funded by the Chief Scientific Officer Professor Sue Hill OBE to promote the scientific workforce in the NHS and their unique skill set in finding solutions to improve patient care.

BOOK YOUR FREE PLACE— Places are limited and must be booked in advance. For more information and to book online go to: www.innovationagencynwc.nhs.uk/news-events/hackathons
